Liquidations

Barbarotto Machinery offers unmatched results in assuring that your surplus equipment is successfully marketed.

On-going Liquidations insure that your assets are not sold below market value, which is often a reality at an auction. Backed by over 30 years of experience in the Wire and Fastener Industries, Barbarotto Machinery offers unmatched results in assuring that your surplus equipment is successfully marketed in a timely fashion. Our #1 Priority is to maximize your return. Whether you have just one machine or an entire plant, detail is taken to assure the best possible results. **Our Liquidation services** include everything from inventorying the equipment and tooling, market research, advertising, quoting, negotiating the sale, and collecting of the funds.

When you put your assets in our hands you are assured of the best possible results.

Partial Plant Liquidations often allow the manufacturer to obtain cash from unused machinery so that they can continue operating. Complete Plant Liquidations can include a Guaranteed Buy-out after a agreed upon period of time. We also accept your unwanted machinery on consignment where we can clean, paint and repair tired machinery to increase its value.

Auctions

Serving the Wire and Fasteners Industry exclusively, Barbarotto Machinery offers complete, fair and honest Auction experience.

Disposing of small lots of equipment or complete facilities, we treat each sale with the understanding that years of hard work and investment went into obtaining your assets.

Starting with a fair appraisal, we then offer several options which include:

1. A Commission Sale which results in all proceeds from sale (less the direct expenses) going to the owner. Our Commission is paid by the Buyers Premium that is charged over and above the actual bid.
2. A Guaranteed Minimum Return, with an agreed upon split of the additional proceeds.
3. A Cash Buy-out. We buy your machinery and take all the risk at the sale.

Talk to us for ideas to preserve your assets.

We Represent the Finest in New Machinery

Videx has been represented here in North America by Barbarotto Machinery for over 30 years.

The Videx Name Means Innovation!

All Videx systems are modular and we can combine operations to better serve our customers.

If you can think of it, we can build it. Automation and combining operations is our specialty.

VA High Speed Dual Spindle Thread Rollers

Features 2 Individual Adjustable Rolling Stations

- Thread 2 Diameters
- Thread & Knurl
- Straighten & Thread

Wire Forming Automatic & Semi-Auto

- Straighten
- Cut Off Blank
- Cold Heading
- Chamfer
- Thread
- Form Roll
- Groove
- Bend to Finished Product

Any & All Combinations, Easy Set Up!

Rod Heading & Extruding

- Diameters up to 2"
- Extrusion length up to 8"
- Long bars up to 30'
- Hand Feed / Magazine Feed

Straighten & Cut-Off Quick Change Models

- Less Tool Expense Per Diameter
 - High Speed - Up to 350 FPM
 - Up to 600 Cuts Per Minute
- 8 Standard Models - Up to 1-1/4"

Impact Cutters or Bar Shears

Crop straight bars to precise lengths with a square cut off face.

- Cut off length repeatability $\pm 0.003''$ by hitting a positive stop.
- Bar is supported during shearing, assuring square cut off face.
- Compact Design
- Quick Change over on diameters and lengths.

Chamfering Machine For Round Bars

- Diameter range .187" to 3".
- Unlimited lengths example 4" to 30'
- Stamping on single or double end
- Attached to any Straighten and Cut machine
- Can perform two different operations on each end.

Solid Die Hot Forge Machines

- 300 Ton to 500 Ton Model
- Both Fully Automatic & Semi-Automatic Machines Use Magazines (For Easy Handling)

PMC

Guaranteed Performance.

Barbarotto Machinery is pleased to offer
PMC Thread Rolling to the North American market!

In-Feed / Thru-Feed Hydraulic Thread Rollers 2 Die & 3 Die Models

- Proven Technology, producing Quality Threaded Parts
- Sturdy, Durable, High Quality Construction
- Sensible Price Structure
- Technical Support and Training here in the USA
- High Quality Thread Rolling Dies

Capacity Range: Models available up to **250,000 lbs.** of rolling pressure.

Suitable for Wide Range of Roll Forming Threads, including:
Long Screws, Shafts, Scaffolds, Hardware, Bicycle, Automotive,
Construction, etc...

Hydraulic Bar & Shaft Straightening Machine

Heavy-Duty High-Grade Machines for In-Feed & Thru-Feed Precision Straightening

**4 Models Available: Covering range from
5mm Bar Dia. up to 95mm Bar Dia.**

- Capacity 95 mm bar diameter (w/out heat treatment) and 75 mm shaft diameter (with heat treatment)
- 130 mm very heavy duty spindle diameter.
- 300 - 350 mm roll straightening dies diameter X die-width up to 600 mm (max.)
- Machine equipped with one set of Concave & Convex dies for Thru-Feed straightening or special made dies for In-feed roll Straightening
- Suitable for roll straightening a variety of parts.

Chi Ning Nut & Cold Formers

CHI NING
Since 1981

New Chi Ning Nut Formers are Affordable, High-Tech solution for revitalizing The American Nut Industry!
With Over 30 Years of Experience building top quality Cold Formers and Tools!

Capacity: Up to 1¼" Cold, 2" Cut-Off Diameter

**Cold Formers
&
High Speed Nut Formers**

Fastener Packaging Systems

Over 40 Years of Building Hardware Packaging Systems

Bonotto packaging

Kit Packing Solutions

**High Speed
Counters**

**Cell Pack
Bagger**

**Low Profile
Bagger**

**BP-102/104 VFFS Machine
Master Scale & Bagger**

Carton Erectors

Master Scale Solutions

BP-310

**Low Profile 1/4 Keg with
Inspection Station**

BP-306 High Speed Master Scale

Robotic Palletizing Systems

The Finest In Wire Drawing Machinery & Accessories

Drawing Technology Inc.

DTI In-Line Wire Drawing equipment and related Accessories are built by the most experienced team in the industry.

**Model 100
In-Line Wire Drawer**

**Power Turntable
Up To 5,000 lbs**

**Rod Flipper
[Z or S Types]**

**Model 43
In-Line Wire Drawer**

**Power Driven Uncoiler
For Large Diameter Applications**

**Descaling Drawing and
Recoiling**

Power Feed & Straighteners

**Mechanical Descaler
For Hot Rolled Rod**

**We Also:
Remanufacture or Repair
(All Makes & Models)**

AIM - CNC Wire Benders

Barbarotto Machinery is proud to announce that we have been appointed an official Agent for:

**2-Dimensional & 3-Dimensional
CNC Bending Machinery & More!**

**WELDING | SURFACE CUTTING | COLD HEADING | INLINE DRILLING
INLINE PRESS | INLINE MARKING | END THREADING | PART HANDLING**

ADVANCED MODULAR TECHNOLOGY

THE INDUSTRY LEADER IN CNC WIRE BENDING

Aim Inc. brings CNC Wire Forming technology to you with the best technical Support. No matter what level of integration your company needs AIM inc can put together the perfect match for your production line.

- **Expandability & Versatility**
- **Multiple Bending Heads**
- **Concurrent Operations**
